## PROFILE

Electronics technician transitioning into software development. Experienced in PCB testing using automated DFT systems and hardware repair processes, including work with LG electronics products. Currently developing web applications using Python, Flask, FastAPI, HTML, CSS, and SQL. Built personal projects including Todo App and Logo Generator. Seeking an opportunity as a Junior Backend Developer.

---

## TECHNICAL SKILLS

### Programming languages

- Python (functions, OOP basics, modules, file handling)
- HTML5
- CSS3
- SQL

### Frameworks

- Flask
- FastAPI (learning and building projects)
- SQLAlchemy (ORM)

### Databases

- PostgreSQL
- SQLite

### Tools & DevOps

- Git / GitHub
- Docker
- Docker Compose
- Postman
- VS Code

- Postman
- Virtual Environments (venv)

### **Deployment**

- Render

### **DFT Testing (Automated PCB Testing)**

- Operation of automated DFT testing systems
- Running PCB tests using specialized equipment
- Reading and interpreting test results on computer software
- Working with system-generated error logs and reports

### **Hardware Repair Experience**

- BGA rework / reballing
- Flash memory replacement
- DDR memory replacement
- SMD component replacement (resistors, capacitors, ICs, SMT parts)
- PCB soldering based on service instructions

---

## **WORK EXPERIENCE**

### **DFT Operator (LG Electronics Testing)**

3 years

- Operated automated DFT testing systems for PCB boards
  - Performed functional testing using dedicated computer-based testing equipment
  - Executed test procedures according to production instructions
  - Analyzed software-generated test results and error messages
  - Worked with PCB boards during testing stage (not manual diagnostics)
-

# Electronics Service Technician (LG Service Department)

3 years

- Performed PCB-level repairs according to service instructions
  - Specialized in BGA rework and reballing
  - Replaced Flash and DDR memory chips
  - Replaced SMT components (resistors, capacitors, ICs)
  - Worked with boards after DFT/testing stage
- 

## PROJECTS

### Notes App (FastAPI)

- Developed a RESTful API for managing notes using FastAPI.
- Structured the application into modular components (`main.py`, `models.py`, and `schemas.py`) for routing, database models, and data validation.
- Integrated PostgreSQL using SQLAlchemy ORM.
- Containerized the application and database with Docker and Docker Compose.

### Todo App (Flask)

- Developed a task management web application using Flask.
- Designed and implemented a SQLite database to store and manage tasks.
- Built a responsive user interface with HTML and CSS.
- Implemented CRUD functionality for creating, updating, and deleting tasks.
- Deployed the application on Render.

### Logo Generator (Flask)

- Developed a Flask-based web application for generating logos from user input.
  - Designed the frontend using HTML and CSS.
  - Managed project dependencies and virtual environments.
  - Deployed the application on Render.
- 

## LANGUAGES

- Ukrainian — Native
- Polish — A2
- English — A2+ (learning)
- Russian — Fluent
